

## FOOD & BEVERAGE

ALLIED also offers food and beverage hose with the highest quality standards for sanitary transfer of foods and beverages. Allied food and beverage hose protects the integrity of foods and beverages and leaves behind no flavors or smells that other hoses might.

## INDUSTRIAL GAS HOSE

Industrial use hose requires strength, durability and high performance. ALLIED hose has all that plus a wide selection from single line welding hose to transport hose for carbon dioxide and nitrogen discharge. ALLIED provides hose to the iron and steel industry as well as chemical plants and petroleum refineries.

## STEAM HOSE

ALLIED knows and understands it's important for you to know the economics, durability and resistance capability of the hose you use. ALLIED offers many types of hose that fulfill your needs. Reliability in durable economical hoses is what matters with general hot water/steam applications as well as petroleum and chemical product transfer and transport.

### We Have The Exact Hose That Meets Your Needs

## AGRICULTURAL

Whether transporting liquids such as ammonia, water, abrasives, liquid fertilizers, water soluble chemicals, insecticides, phosphoric acid and sulfuric acid, ALLIED has a hose to meet your needs!

## AIR HOSE

ALLIED high quality hoses can be used for many different industries. Made of durable covers that suit your needs when quality and toughness counts, these hoses are excellent for heavy-duty use and tough climates where weather resistance matters.

## FIRE HOSE

Our fire hose is the best equipment you can buy. Covered in 100% fire proof double or single polyester, this hose comes through when seconds count!

## MATERIAL HANDLING

ALLIED's material handling hose is high grade abrasion resistant hose that is also static conductive. Use it for handling sand, cement, grout, wet plaster, granulated lime and other dry abrasive materials.

## PETROLEUM

ALLIED has the best hose for your gas market, whether a refinery or pumps at a gas station. ALLIED offers the best selection and quality for fueling your vehicle or petroleum transport to and from the refinery. ALLIED can handle all your petroleum needs with our wide selection of long lasting, high quality hose.

## COMPOSITE

"CYCLONES"

You can count on superior wear resistance when it comes to our composite hose. Wire reinforced both externally and internally, our hose is available with both stainless steel and galvanized steel reinforcement braids with layers of polypropylene to make them resistant to corrosive materials. This hose is ideal for loading or unloading from deep holes, transporting liquid chemicals, acids, solvents and petroleum products.

## WATER HOSE

From water suction hose in mines to agricultural and industrial sites, ALLIED has a wide variety of heavy-duty hose for you. Also available are light duty hoses for home and garden use! Remember, ALLIED has the hose to match your specific need.

## SPECIALTY HOSE

Designed especially for high pressure applications, this hose is reinforced with 3 to 4 layers of textile braids or steel. Great for cleaning large storage tanks and ships. Also good for transporting high pressure solvents, paint, hydraulic fluid, air and oil.

## SUPERLITE<sup>®</sup> V

This hose is made for maximum performance. Using a coaxial system that includes a premium outer hose and a venturi device to recover fluid collected in the vapor passage, this hose is UL listed and CARB approved.

## PUMPFLEX I

This gas hose is reinforced with 4 spirals of synthetic tube and can be used with every type of unleaded fuel and super unleaded fuel. The hose wall is constructed of longitudinal static wire and a layer of CSM. The cover is NBR/PVC providing high resistance to petroleum derivatives and abrasives. The highly flexible answer for gas pump needs.
